nazka mapps bvba

| SME started [October 2012](#)

| [3 bio-engineers](#) - Han Tambuyzer, Ides Bauwens & Nicolas Dosselaere

| together more than 30 years of experience in [Earth Observation & \(geo\)data-analysis](#) e.g. *GMES/Copernicus & thermography*

| ESA [BIC](#) company

mission

| nazka makes [smart mapps](#)

| focus on a [sustainable](#) and [participative](#) society

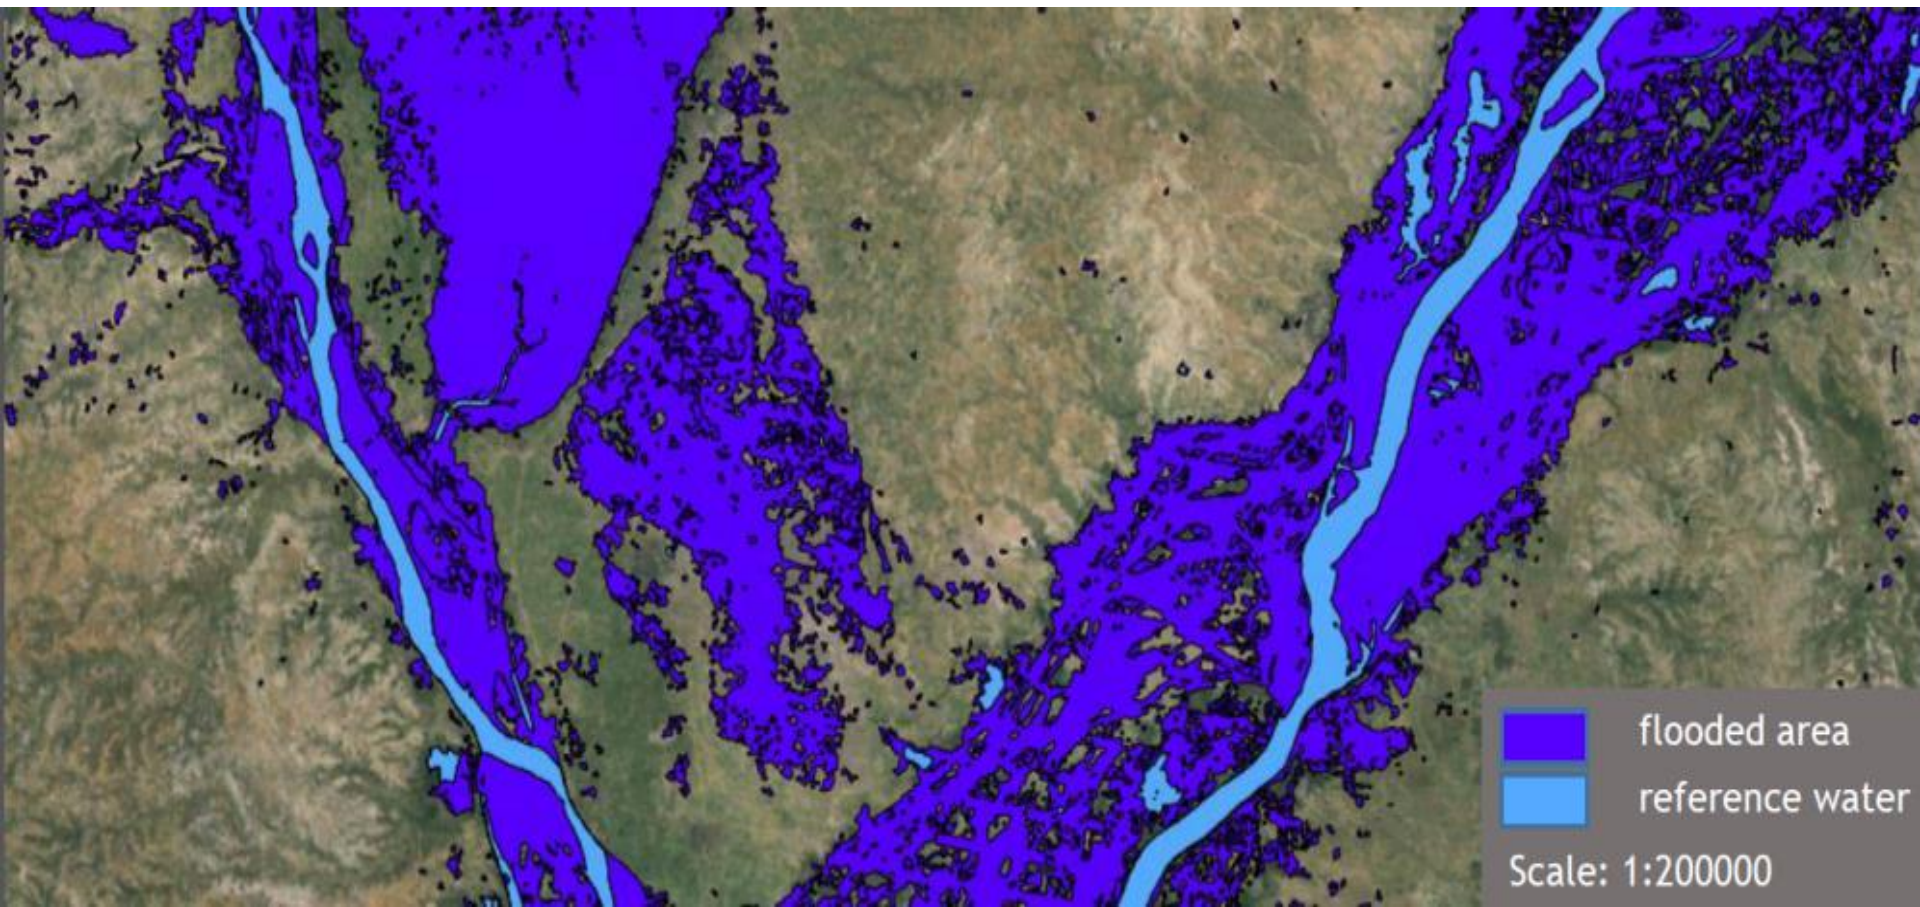

| emphasis on accessibility, simplicity & [user friendliness of our maps](#)

| [open](#)

interactive map applications

- | collect, analyse & convert **geographically** 'data' into valuable '**knowledge**'
- | use these maps to get maximally your message across ('**smart mapps**')
- | keep **complexity** of data & geo-analysis **in the background**
- | "go from **1** map with 1000 functionalities towards **1000** maps with 1 functionality"

VæSSA (www.vaessa.nazka.be)

| supports World Bank & Sri Lankan authorities through satellite based EO products in the context of climate risk mitigation

| historical flood mapping, LU/LC change, height model & interactive map

| VAE programme of ESA

B-Life demonstration phase

| “Biological Light Fieldable laboratory for Emergencies”

| integration of EO/GIS technologies: advanced geo-information products for site selection and monitoring

| integrate interactive mapping applications: easily access & editing of filed data on terrain and back-end collection based on geo-location of all new information

| EO and GIS Capacity building

| IAP – ARTES 20 programme of ESA

skills & ideas for the future

| profile: freelance ICT software engineer (programming in PostGIS, GeoServer, geo-Django, Leaflet, ...)

| open for positive cooperation with research bodies, companies, etc.
