

Belgian Imaging Spectroscopy campaigns: an overview

K. Meuleman¹, W. Debruyn¹, I. Reusen¹, C. Petit², J. Vandenabeele²

¹Flemish Institute for Technological Research (VITO),

²Belgian Science Policy (BELSPO),

- In a joint effort BELSPO and VITO organize a yearly flight campaign to foster the use of Imaging Spectroscopy research and applications
- APEX is expected to be operational in 2007
- Poster gives an overview of the mission area's covered since 2002

- 2005 campaign was flown with AHS 160 sensor from INTA (www.inta.es)
- Thanks to flexibility of the INTA crew all area's were coverd in more or less good conditions
