GEO Vision

To realize a future wherein decisions and actions, for the benefit of humankind, are informed by coordinated, comprehensive and sustained Earth observations and information.

A Global System of Systems

GEO Member States

GEO Member Map for the year 2015

Number of Members (2015)

Africa:	25
Americas:	15
Asia/Oceania:	17
C.I.S.:	7
Europe:	34

Total:	98
---------------	-----------

Number of Members by year

87 Participating Organizations

GEOS Resources

GEOS Resources **GEO**

About **45** brokered data
providers

GEOS Resources **GEO**

About **45** brokered data
providers

Publish

More than **50 Million** accessible
resources (mix of data collections
and datasets)

GEOSS Resources **GO**

About **45** brokered data providers

Publish

More than **50 Million** accessible resources (mix of data collections and datasets)

Contain

More than **174 Million** assets (mix of satellite scenes, rain streamgauge records, etc.)

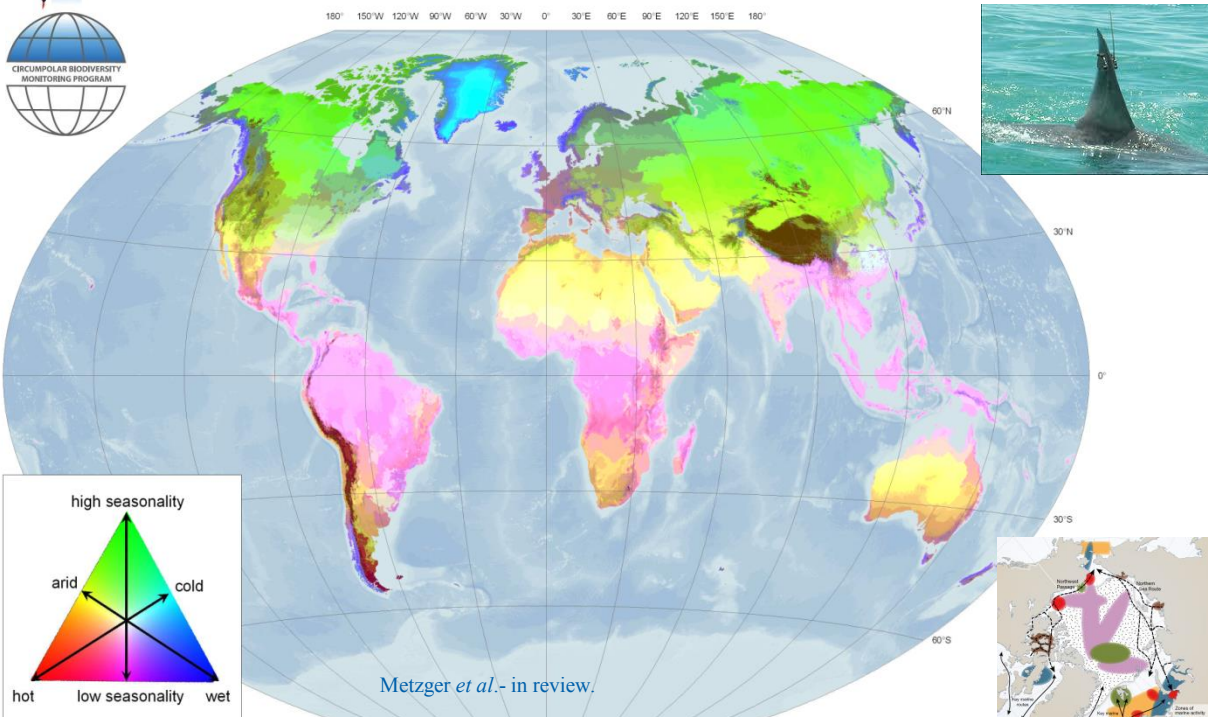

GEO Biodiversity Observation Network

(France, Germany, Japan, Netherlands, Spain, Sweden, South Africa, USA, Diversitas, GBIF, IUCN)

High-resolution bioclimatic map of the world

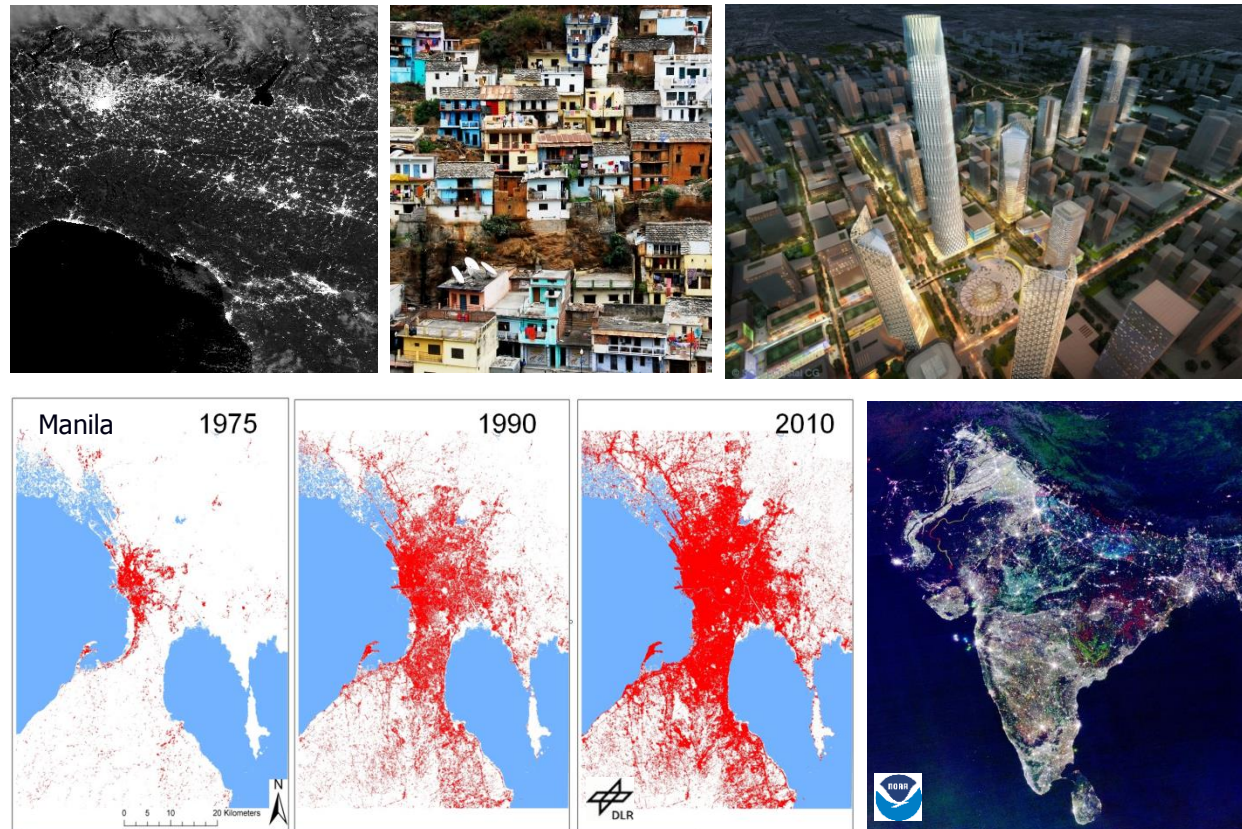

- * Response to CBD
- * Essential Biodiversity Variables (EBVs)
- * Global high-res bio-climatic map
- * Arctic and French Biodiversity Networks
- * Strong outreach

Global & Local Urban Footprints

(China, EC, Germany, Greece, Italy, Pakistan, USA)

- * 35-yr evolution of 26 mega-cities
- * Global night-time lights for 2012
- * Urban Heat Island patterns
- * Over 3'700 cities mapped using ASTER (15m)

Cold Regions Monitoring

(Canada, China, Denmark, Germany, Norway, India, Italy, Japan, Spain, USA, ICIMOD, IEEE, WCRP, WMO)

- * CryoClim climate monitoring service
- * Svalbard Integrated Arctic Earth Observing System
- * Sea-ice ECV for Arctic/Antarctic snow-cover
- * Focus on Tibetan Plateau
- * Glacier dynamics mapping

Leveraging Earth Observations for Reducing Price Volatility

Monthly Wheat Prices 1960-2011

(\$/Metric Ton) Source: World Bank

Crop Information for Decision-Making

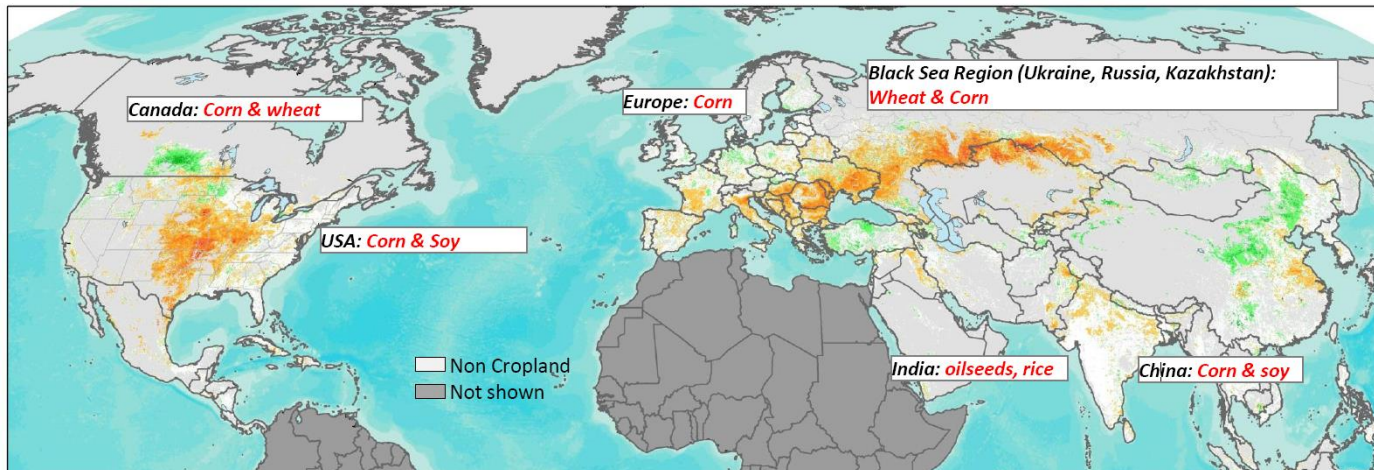

(Canada, China, EC, France, Japan, Kazakhstan, India, Mexico, Russia, USA, CEOS, FAO, WMO)

Northern Hemisphere NDVI Crop Anomaly, August 13th, 2012

- * GEOGLAM part of G20 Action Plan on Food Price Volatility
- * New crop outlook
- * Rice crop monitoring

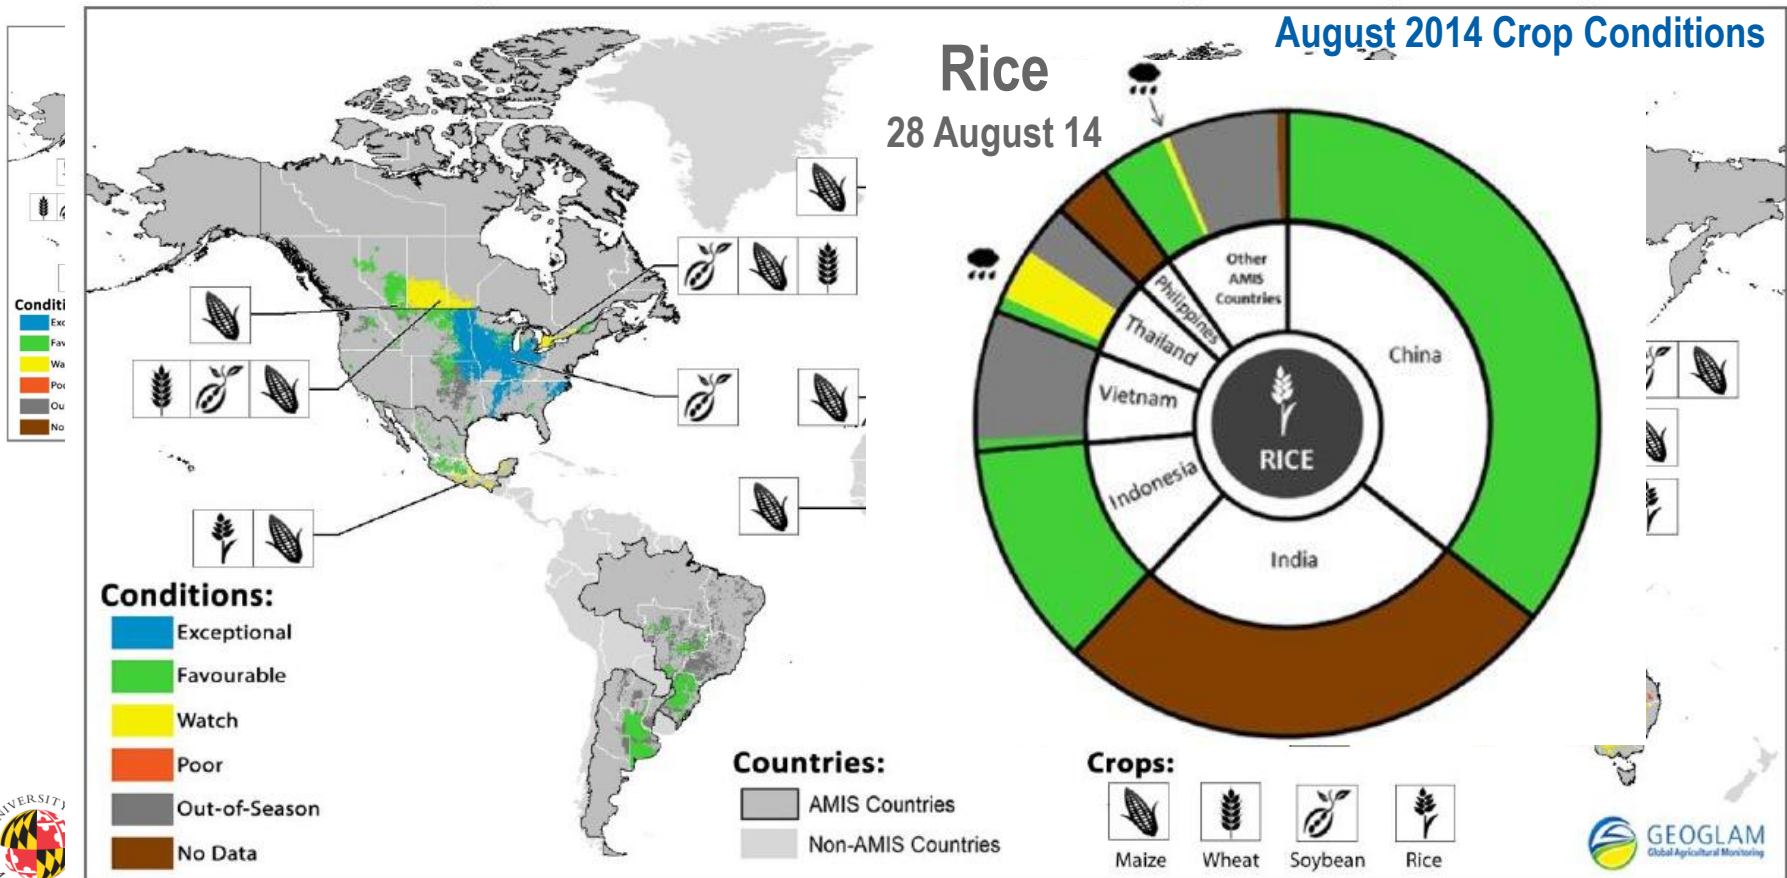

Observed highlights:

- Drought conditions persist in US, south eastern Ukraine, Russia, and Kazakhstan, with slight improvement in some areas in northern Kazakhstan
- Rains in India mitigate dry conditions

GEOGLAM Crop Monitor for AMIS

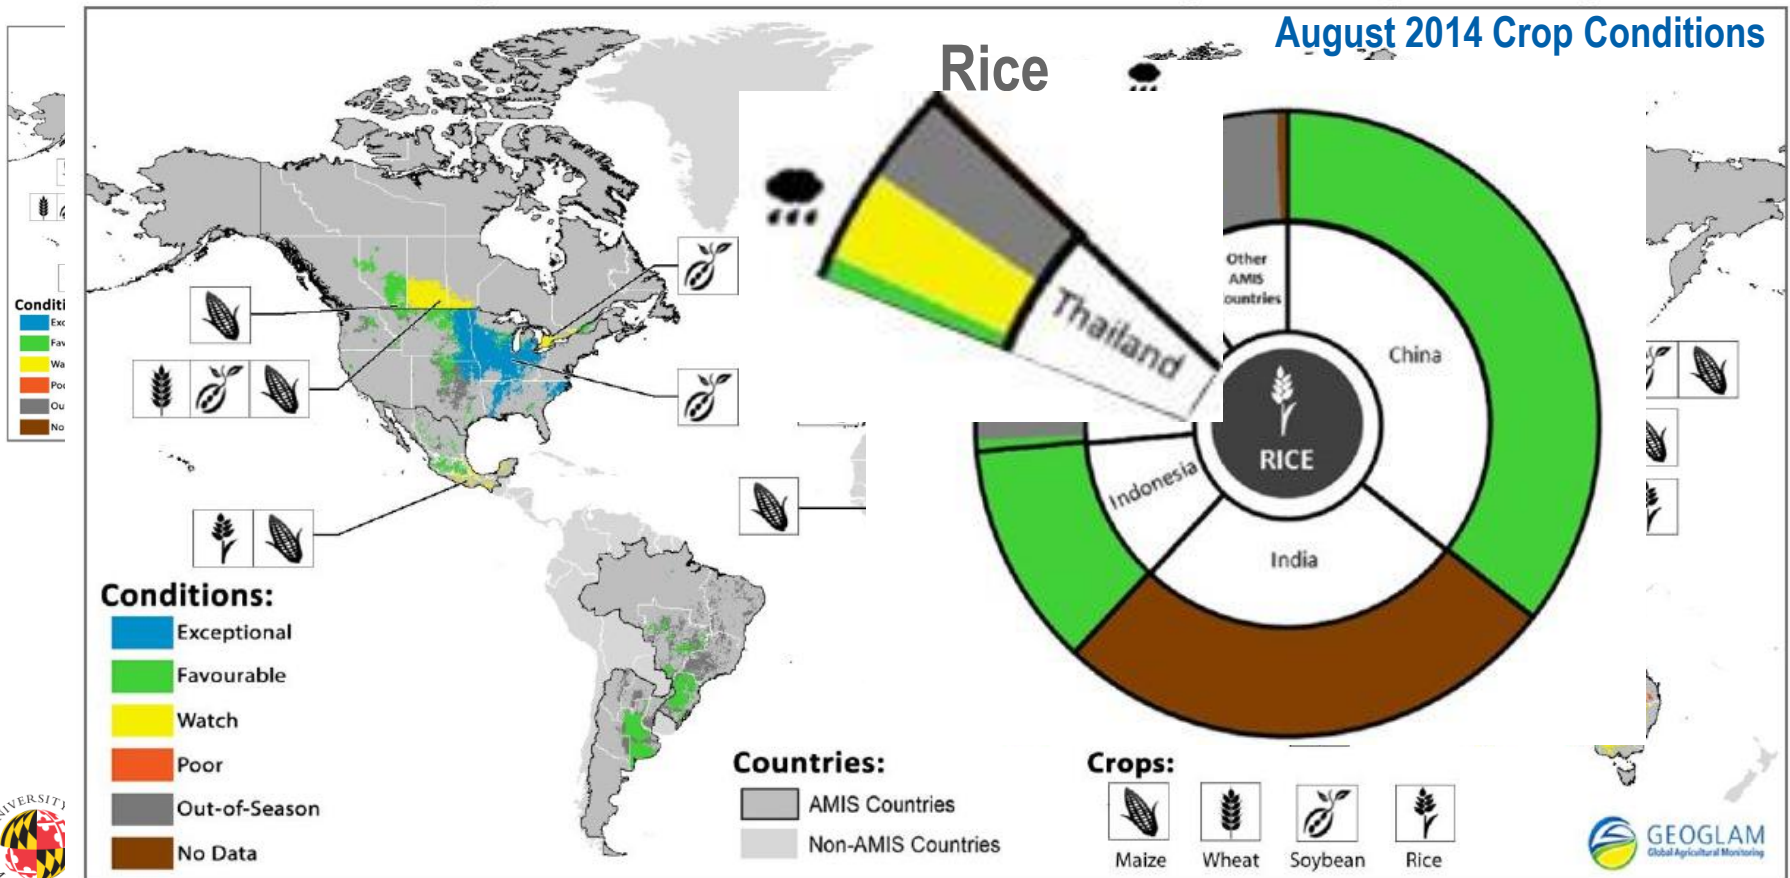

- Operational since September 2013
- 36 institutions, 22 countries + 7 international organizations
- Global map for the 4 AMIS crops (Maize, Wheat, Soybean, Rice)

GEOGLAM Crop Monitor for AMIS

- Operational since September 2013
- 36 institutions, 22 countries + 7 international organizations
- Global map for the 4 AMIS crops (Maize, Wheat, Soybean, Rice)

GEOSS Implementation Requires: *Data Sharing Principles*

- **Full and Open Exchange of Data**
- **Data and Products at Minimum Time Delay and at Minimum Cost**
- **Free of Charge or Cost of Reproduction**

Landsat Scenes Downloaded from USGS EROS Center (Cumulative)

Before Open-Data Policy: **53** scenes/day

After Open-Data Policy: **5,700** scenes/day

Free and open data policy

Landsat Scenes Downloaded from USGS EROS Center (Cumulative)

Canada's Experience

RADARSAT Images Acquired by the Government of Canada

Global Forest Change

Published by Hansen, Potapov, Moore, Hancher et al.

Results from time-series analysis of 654,178 Landsat images in characterizing forest extent and change, 2000–2012.

Trees are defined as all vegetation taller than 5m in height and are expressed as a percentage per output grid cell as '2000 Percent Tree Cover'. 'Forest Loss' is defined as a stand-replacement disturbance, or a change from a forest to non-forest state. 'Forest Gain' is defined as the inverse of loss, or a non-forest to forest change entirely within the study period. 'Forest Loss Year' is a disaggregation of total 'Forest Loss' to annual time scales.

Reference 2000 and 2012 imagery are median observations from a set of quality assessment-passed growing season observations.

Example Locations

Forestry and Tornado in Alabama ▾

[Zoom to area](#)

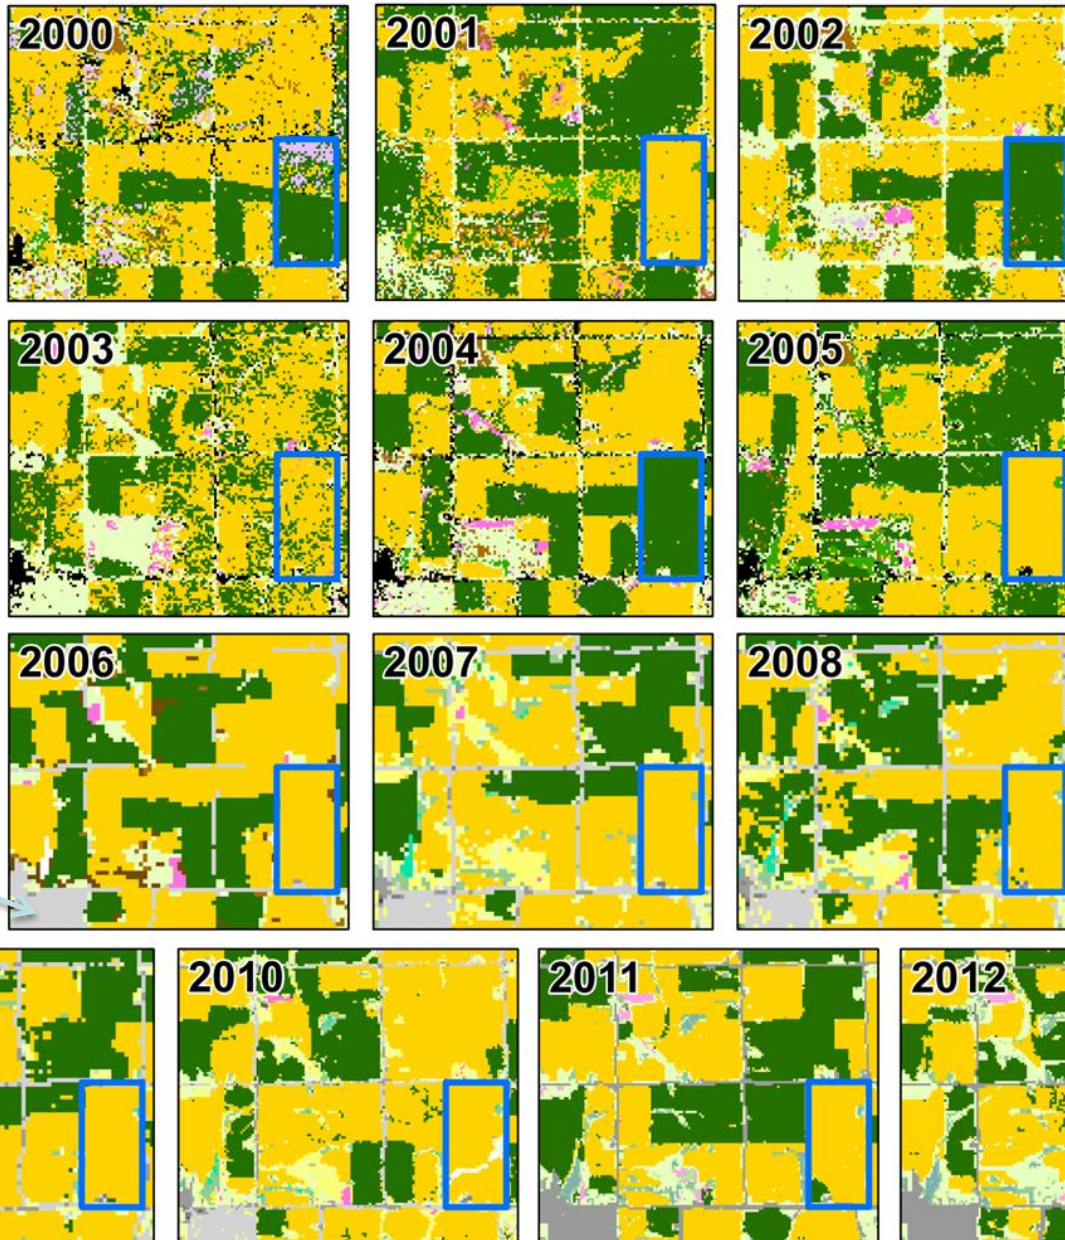

The trail of destruction from the April 27 2011 [Tuscaloosa-Birmingham tornado](#) is clearly visible in this location. This was one of 358 recorded tornadoes during the [April 25-28, 2011 tornado outbreak](#), the most severe in US history.

[Zoom out to spot tracks from other tornadoes nearby](#)

Visualizing the Impact of Public Policy

EXPLANATION

- Corn
- Soybeans
- Small grains / Hay
- Alfalfa
- Fallow / Idle Cropland
- Grass / Pasture / Non-ag
- Woodland
- Urban / Developed
- Developed/Low Intensity
- Developed-Open Space

Waterloo, Iowa

Countries have borders; Earth observations don't.
