

Spatially plan the population growth in Wallonia and, in particular, in Liège for shaping the Smart Cities

LULC

Remote Sensing & GIS

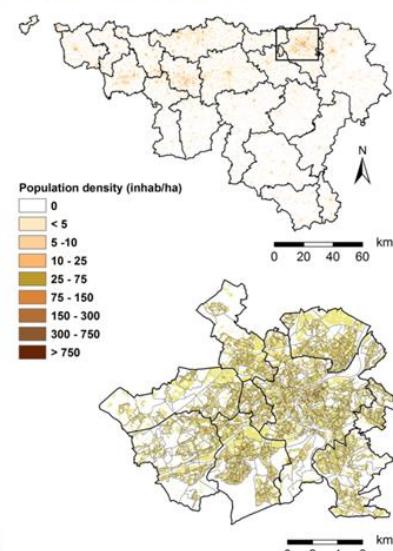

New LULC maps, focus on urban classes

Population

Population Density per ha

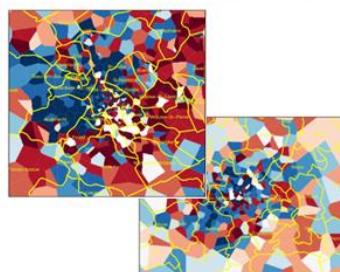

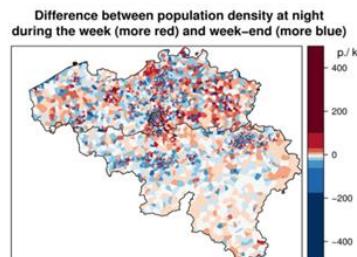

New tools &
data for
regional risk
assessment

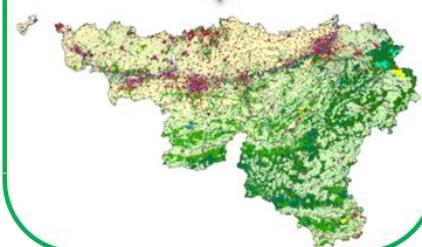

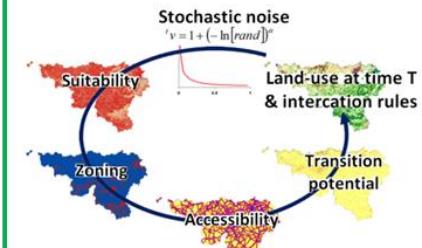

Dynamic

Population Density per day or hours

Modelling Region

Land-Use & Population Density -> 2050

CORE OPERATIONAL
PROJECT

MOERMAN'S FUND

09/2015 -> 12/2018

EARTH OBSERVATION AND POPULATION MODELLING FOR MONITORING URBANIZATION

Supervised Classification Methods for Mapping Land Cover and Land Use in Wallonia by B. Beaumont (ISSeP)

Spatial disaggregation methods for fine-scale population mapping by E. Hallot (ISSeP)

Dynamic population mapping from mobile phone data by D. Jacques (ULB)

Multi-level modelling of Land Use and population dynamics by L. Poelmans (VITO)

Quantifying and monitoring urban sprawl in Flanders using the RuimteModel Vlaanderen by A. Pisman (Vlaamse Planbureau voor Omgeving, Departement Omgeving)

The urban component of the French Land Data and Service Centre (THEIA) by A. Puissant (Professor at UStrasbourg)

Modelling urban densification and expansion processes: a regional perspective by J. Teller (Professor at ULiège)
