

Dark Side of Remote Sensing meeting

Jean-Christophe Schyns & Joost Vandenabeele
BRUSSELS – 09/12/2015

THE STEREO III PROGRAMME

- Support to the Exploitation and Research in Earth Observation
- Belgian remote sensing research programme
- To stimulate the development of new remote sensing applications.
- To introduce the use of remote sensing in new disciplines and to new users.
- To promote remote sensing, and especially results of Belgian and STEREO research

THEMATIC PRIORITIES

- Global monitoring of vegetation and evolution of terrestrial ecosystems
- Management of the environment on a local and regional scale (water, soil, forest, nature reserves and biodiversity, agricultural areas, coastal areas, urban and peri-urban areas...)
- Interaction between (change in) land cover and climate change
- Epidemiology and humanitarian aid
- *Security and risk management*

THE STEREO 2016 CALL FOR PROPOSALS

□ Call for thematic network projects

- This refers to major projects lasting **4 years**.
- They can cover **fundamental and/or application oriented research**, but must have societal relevance.
- The research should be **innovative**.
- The research is conducted via **partnerships involving** 2-5 research teams (from Belgium) inevitably rounded out by (an) international team(s).

THE STEREO 2016 CALL FOR PROPOSALS

Call for thematic network projects

Expressions of interest (mandatory) for 28 January 2016.
