HYRESSA-objectives (1/4)

- To **identify European users and/or providers** of hyperspectral data:

about **700 users and/or providers** of hyperspectral data identified from **27 countries** (21 member states, Iceland, Norway, Switzerland, Romania, Bulgaria, Croatia)

Contacts geographical distribution

HYRESSA-objectives (2/4)

- To investigate the **Strengths-Weaknesses-Opportunities-Threats** (SWOT) and to identify the **User Needs** of the scientific hyperspectral remote sensing community:

User Needs identified at the SWOT and User Needs workshop, 5-6 July, 2006, DLR, Oberpfaffenhofen are:

- * **Standardization**
- * More **transparency** on calibration processes
- * **European platform** for hyperspectral remote sensing
- * **Education and training**

Questionnaire on User Needs (QUN) will be **available soon** from the HYRESSA website (<http://www.hyressa.net>)

Your opinion is valuable!

HYRESSA-objectives (3/4)

- To explore **strategies** on how to **build a European network** and to **coordinate a user-oriented European hyperspectral remote sensing Research Infrastructure**:

1st HYRESSA workshop on Hyperspectral Remote Sensing in Europe jointly organised with the
10th Intl. Symposium on Physical Measurements and Signatures in Remote Sensing

12-14 March 2007, Davos, Switzerland

<http://www.hyressa.net>; <http://www.ispmsrs07.org/>

HYRESSA-objectives (4/4)

- To investigate **how to refine and to review existing protocols in compliance with standards** (cfr. EU initiative INSPIRE)
- To design a **plan for future collaboration** to move **“towards an improved access to hyperspectral data in Europe”**
